

Reno of the Year

This gorgeous renovation was created and styled by Kath McDonald from KM Interior Design. What a transformation. Owners Rebecca and Regan are delighted! We are loving it too.

Before

After

The kitchen update included new floor to ceiling cabinetry, an engineered stone bench top, streamlined black handles and push to open doors.

The outdated, old existing floor coverings were removed to reveal the original Tawa timber, which was then blonded.

Storage was doubled throughout by integrating push to open cabinetry and engineered stone bench tops.

Newly appointed chrome tapware references the Kartell dining room pendant and the brushed stainless steel kitchen appliances. We increased the luxe factor by installing a Carrara marble splash back.

Gorgeous shutters were added and window treatments were updated with roller blinds and curtains. Part of the kitchen wall was removed to open up the living/dining connection.

We enhanced light and flow by installing French doors, blurring the line between indoors and out, while also gaining access to the newly constructed back deck.

Linen curtains in the master bedroom added a relaxed, natural feel and painting throughout the whole home created a fresh, clean canvas.

A wall removed from the old toilet room and space taken from the existing laundry, created a new children's bathroom, which we fitted out with ultra kid friendly tiles.
